Options:

- Custom Models Available

Keating's Portable Basket Rack is the ideal accessory for huge volume cooking stations. With three standard models available, choose the Keating Basket Rack which will help keep your kitchen organized and running efficiently, even during peak times. Custom models can also be manufactured according to your specifications.

Rugged construction

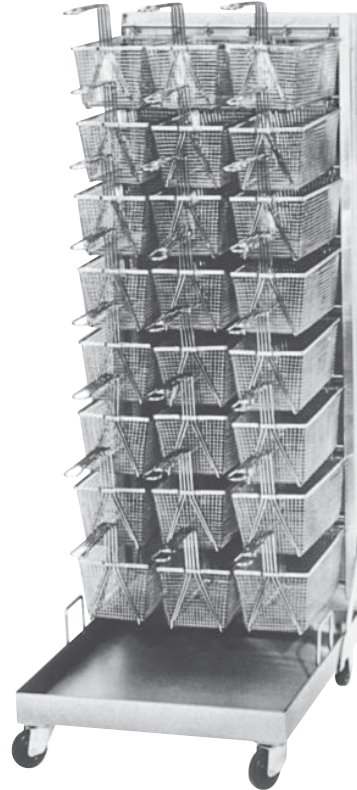

The Keating Portable Basket Rack is constructed of highly polished stainless steel to ensure durability. Extra sturdy basket hanger rods ensure that baskets grip and don't slide off.

Holds a variety of baskets

Six inch vertical spacing on basket rods hold a large variety of baskets. The BR-18 holds up to 18-14" split baskets, the BR-24 can hold up to 24-14" split baskets. The BR-32 holds up to 32-14" split baskets.

Easy portability

Manufactured with four heavy duty casters, the Keating Basket Rack can easily be maneuvered around the kitchen. Two front swivel casters make moving the basket rack an easy task, even around tight corners.

Baskets are Optional

Application flexibility

Whether you need extra storage space or just want to keep your kitchen organized, the Keating Basket Rack is the ideal accessory for any basket application. Use to prepare food products at separate prep locations and then transport to frying areas or to pre-load food products into baskets before peak rush times.

Easy to clean

Stainless steel construction, removable bottom pan and rods make it easy to clean the Keating Portable Basket Rack.

Portable Basket Rack

Portable Basket Rack

Portable Basket Rack

Designed for maximum portability, the Keating Portable Basket Rack is constructed of a Stainless Steel base and back, mounted on heavy duty casters. Stainless Steel rods have been designed to support the weight of hanging baskets.

SPECIFICATIONS

Base - Constructed of 1-1/2" x 1-1/2" 10 gauge Stainless Steel angles, mounted on casters.

Back - Constructed of 18 gauge Stainless Steel attached to two 1" x 1" 10 gauge channels, which have been braced and welded to the base.

Pan - Removable pan is made of 18 gauge Stainless Steel, with handles.

Casters - Four casters are mounted under the base. Two fixed 3" diameter casters are positioned in the back, and two 3" diameter swivel casters with brakes are positioned in the front.

Hangers - Made of Stainless Steel rods, the hangers are 5/16" in diameter, and are mounted in the back frame.

Basket Capacity - The BR No. 18 holds up to 18 - 14" split baskets. BR No. 24 holds up to 24 - 14" split baskets, and BR No. 32 will hold up to 32 - 14" split baskets.
