- ▶ Contains no soaps or detergents that will contaminate oil/fat
- ▶ 14 oz. cans (396.9g) – 12 per case

Especially Formulated for Cleaning Commercial Frying Equipment

- CLEANS DEEP DOWN INTO SURFACE GROOVES
- HEAVY DUTY FRYER CLEANSER AND STAINLESS STEEL POLISH

Keating Klenzer Gives Dingy, Dull Stainless Steel a Dazzling New Luster

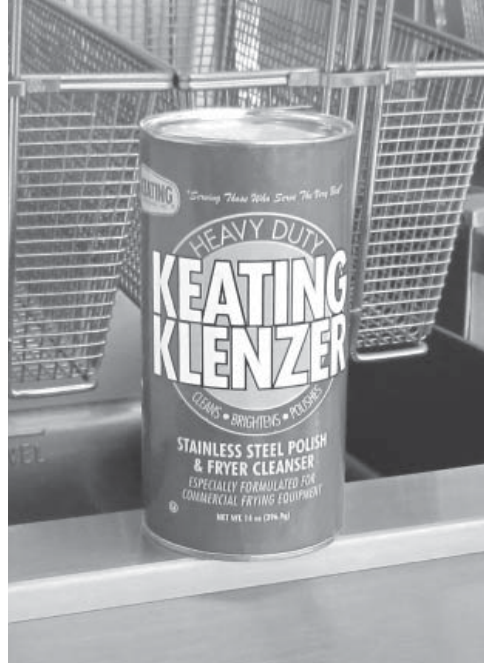

Keating Klenzer is the finest dry stainless steel polish available. No other cleaner lasts longer and cleans better than Keating Klenzer. Stainless steel owes its sheen to innumerable fine light-reflecting scratches. When these become filled with grease, soap, dust or other foreign matter, stainless steel loses its natural luster. Keating Klenzer cleans deep down in the surface grooves to lift out dulling dirt and restore the original sparkling gleaming finish. And unlike liquid cleaners, no sticky residue is left behind. A small portion of Keating Klenzer can clean large surface areas.

Directions for Cleaning Stainless Steel:

Sprinkle **Keating Klenzer** on a dry cloth and polish surface with the grain - never across the grain. Wipe off any residue with a soft, dry cloth. Rinse surface clean with water.

Directions for Cleaning Fryer:

Sprinkle powder liberally on a damp cloth, and wipe fryer surfaces clean. Rinse surface with water. **Keating Klenzer** contains no soaps or detergents that will contaminate oil. Use daily to maintain fryer. Use with **Keating Sea Powder** to keep your fryer in perfect condition.

Sea Powder

- ▶ 8 lb. jars – 4 per case

Keating Sea Powder dissolves any greasy build-up. When used with boiling water, Keating Sea Powder is easy to use and superior at removing carbonized grease build-up in fryer vessels – the leading cause in premature oil breakdown. If used weekly, your shortening will last one to two days longer, and your Keating fryer will be in perfect condition for years. Keating Sea Powder contains no caustic ingredients and a small amount, mixed in hot water, makes an excellent cleaner for greasy floors, walls and exhaust hoods, too.
